

Dear County Council,

We are the Kids Against Plastic Green Team at Mapperley Plains Primary School. We are trying to get rid of as much single use plastic in our school, as we can. We've already managed to replace our plastic cups with reusable ones and we've replaced milk cartons and straws for reusable bottles and larger containers (that are recycled) and might consider changing to glass bottles in the future. As part of our attempt to become a Plastic Clever School, we did an audit and found out that we use over 350 yoghurt pots every week! We would like to see if it's possible to deliver larger yoghurt pots to the school instead of the little ones. The kitchen staff will then scoop out the yoghurt into reusable bowls that can be washed. The larger pots will then be recycled or used for art projects. Please, please, please consider helping us to achieve our goal in helping the community and saving the planet. We look forward to hearing back from you with good news.

Yours Sincerely,

Thank you for your mail,

I am so impressed with the Kids Against Plastic Green Team at Mapperley Plains Primary School! Well done on the changes you have made to date.

I will look at a larger yoghurt pot for yours and all schools, however to complete this change I would require help from a student council or Kids Against Plastic Green Team, to look at the new products with me for sustainability and taste. Do you think this could be something you can help me with? I will put my e-mail and contact telephone numbers at the end of my e-mail for yourselves and Mrs Meek to contact me and make arrangements for me to come into your school with yoghurt samples.

Please be assured we want to help communities and help save the planet with you and for you

Really looking forward to meeting such superstars and supporting you in any way we can
Kindest regards

Donna
