

Plastic Clever School action plan

What problem plastic(s) are you going to tackle?

reduce single use plastic bottles and other packages /
separate trash in our main building

What can you do to reduce it?

promote the use of existing fountains /
get everyone to use reusable bottles

What help will you need?

we deliver a letter to the school direction asking to
stop selling single use plastic packages and bottles
we learned how to transform
all the trash we collect
in our school and in many coastal
clean ups in art

How will you know you've been successful?

If everyone uses a reusable bottle of water and there are
no single use plastic packages for sale in school
All the classrooms will separate trash suitably
